Institute for Technology and Professional Studies

Online Training Portal

The Institute for Technology and Professional Studies offers enterprise level classes in the following training categories

Networking and Servers

Covers critical enterprise level skills for IT infrastructure profitability. For those who rely on a serious IT infrastructure, Institute for Technology and Professional Studies offers training to help increase skills and capabilities of IT staff in deploying and managing the most important Networking technologies as well as Server technologies, in a enterprise environment. Learn about operating system functionality, role implementation, networking technologies, network security; and learn how to use specific vendor technology's to get the most out of your investment from day one!

Database Web Development Web Design

Our specialized training in Database Systems, Web Development and Web Design will help you build a professional and creative portfolio. The advanced level offers the opportunity to deepen your database infrastructure understanding or specialize in a related art/design field such as digital imaging, digital photography, graphic design, web design or game art.

End User and Desktop Operator

Organizations of every size and business model need desktop computer skills as a basic building block of success. Proficiency with desktop software as Windows VISTA, Windows XP, Microsoft Office 2007, Crystal Reports, Windows Mobile, Pocket PC, Palm OS, Internet Explorer, Adobe Professional 8.0 and Adobe Reader at the user level, will dramatically increase productivity and facilitate better business results. By honing their desktop skills, your employees can create more effective spreadsheets, better reports and more dynamic presentations.

Business Curricula

Today's organizations are discovering the many advantages of effectiveness management in domains as: Team Building, Business Analysis, Strategic Planning, Customer Service and Business Skills for the IT Professional. Businesses of every size and industry are benefiting from the achievement of desired results on time and on budget. As a result, many corporations now require that an individual have the Project Management Professional (PMP®) credential whether for individual advancement within an organization or as a condition of employment

Express Guide

Express Guides enable IT professionals to stay ahead of the curve, by providing fast access to critical information and training earlier in the technology adoption cycle. IT professionals who need to master new technologies immediately have access to a reliable learning resource with trusted content, to develop skills critical for certification and ongoing career development.

Test Prep View

SkillSoft's Test Prep Exams allow learners to test their knowledge in a simulated certification-testing environment, for many of the most popular certification exams from Microsoft, Cisco, Oracle, CompTIA and PMI. Each SkillSoft TestPrep Exam maps to 100% of the objectives on the vendor exam
